SANDSTONE ESTATES

POLICY DOCUMENT LOCOMOTIVE TRAVEL

1.1 UNAUTHORISED PERSONS NOT ALLOWED TO TRAVEL ON LOCOMOTIVES

1.1.1 Members of the public

9.1.12 A person, other than an employee, as provided in sub clause 9043.2 hereof, must not be allowed to travel on a locomotive, or in the driving compartment of a motor coach or driving trailer, unless he is in possession of a printed or written permission from an authorised official of Sandstone Estates (Pty) Ltd, and holds, in addition, an Indemnity Form duly completed and signed off by the Sandstone estates Safety Manager.

2 Sandstone Estates employees

2.1 The only employees who may travel on a footplate (locomotives, motor coaches and driving trailers included – see definitions in train working rules), or in the cabs/drivers' compartments of locomotives, motor coaches or driving trailers, not being used to control the locomotive(s)/train, except the driver and driver's assistant responsible for the operation of the locomotive(s)/train, are those required to do so for service purposes and holding permits issued specially for that purpose by a Director of Sandstone Estates (Pty) Ltd [see also sub clause hereof], and certain other officials who are from time to time given written permission by the Directors to travel thereon in the company of a supervisor (locomotive personnel).

2.12 The Safety Manager with approval of the Directors, may also, by means of the local appendix or other instruction, authorise a maximum of two persons (shunters, spare drivers or driver's assistants, etc.), to travel for service purposes on the locomotive(s) or in a driver's compartment of a motor coach set. It is, however, only permissible to travel in the locomotive/driving compartment if other suitable accommodation is not available on the train, and it is only permissible to travel on the footplate if a cab or driver's compartment not being used as the footplate is not available. Unless specially authorised by the Directors.

2.13 Except as provided in the following sub clause only two persons at a time in addition to the driver of an electric motor coach train, or the driver and driver's assistant in the case of an electric, diesel or steam locomotive, are permitted to travel on the footplate.

2.14 When motor coach, locomotive or traffic tests are being conducted, the engineer conducting the test may, if he considers it necessary for the satisfactory conducting of the test, authorise a third additional person to travel on the footplate. In the case of an electric or diesel locomotive, with the approval of the Directors and Safety Manager, a competent employee may be instructed to take over the duties of the driver's assistant and the driver's assistant may be instructed to travel in the trailing driver's compartment pending further instructions.

2.15 Sandstone Estates (Pty) Ltd employees or other persons permitted to travel on the footplate must not in under any circumstances, enter into discussion with or otherwise distract the drivers' or drivers' assistants' attention from their duties.

2.16 A Conductor may not enter the leading driving compartment of any locomotive, except in the case of emergencies.

2.17 A special book must be kept by the designated issuing official in which particulars of all authorities issued must be recorded.
